

Dark green poos since day dot
A few that are mustard colour - cottage cheese consistency

Wind pain
Angry unhappy baby at the start
Since wilby's in december changed completely
Wind pain - a few days old

At 6 week Vaccine detox + meningococcal B + 1 dose of the flu
After meningococcal B - as soon as he woke up hysterically crying, wanted cuddles, either asleep or unhappy. Only lasted for the day and night after.

At 6 week & 4 month - hysterically crying
Slight temp

Gastro drops - harry's normal poos

C-section

Little serious boy
Just looks at them, no emotion to nan and pa
Observes a lot
Work hard to crack a smile
Personality
Very interested in textures, ribbons,
Dosen't like books

Love his stand up toy, hitting
Loves music, piano, likes noise with hitting things

If he's losing it, we go outside for a reset - **loves it outside+++**

Losing it at nap time
Usually rock him, arches his back, dosen't want to go in the rocking position.

Hit and miss in the pram - doesn't fall asleep in the pram

First born he was angry
Either asleep or crying in pain - angry cry
Not awake and quiet and happy- lasted for a month until willby's.
He was induced
With the colic, upset

Tried breastfed, pumped for a month, couldn't work out the latch, tongue-tie.
Tongue tie cut, wasn't latching that well.
Given breast milk for a month
Aptamil - Colic and constipation

We tried changing to goats milk - a lot more poo, cottage cheese with mucous.

Sleeps well on me,

SLEEP

Bed at 7PM, dream feed at 10am. 830/9/930 wake up

10-2am - bottle

2am bottle

Every since day light savings - since April all over the shop with sleep

Crying++ crying whiny and crying hysterical

Never wake up without cried

Sleep position - side and tummy

Restless at night

Waking up alot unsettled - not hungry

Nap refusals

If you move him - he cracks it

Pain threshold

Grandma and grandpa

Giving him a few smiles

Makes her work for it

Appetite

Chill, feed him every 3-4 hours

Just started solids week 3

Pumpkin, zucchini, sweet potato, rice porridge, banana

Puree, he's had a bit but not that interested.

5PM - really clingy, wants you to hold him

First 5 months had him in a capsule, 6 weeks onwards would cry in the car, he hated it.

Hysterical the whole time 45 mins

Now carseat - hes better but hit and miss.

Baby carrier, OK in it

Loves when i sing to him, loves the dog

Go to a sensory class, he hates it.

Social

Swimming - when they dunk him under, he loses it.

LOVES water, calms him down

Loves the waves, loves watching waves, seems calm and chilled.

Cafe with the mums, sits on my knee

With dad Daniel, face will light up
Makes funny faces, he's fun with him.

4.5 months - teething, took 4 weeks to come out - a lot of panadol and nurofen. Grizzly, more clingy, red cheek, drooly. Bottom 2.

Grabs both ears, more when hes tired, grab ears and rub his eyes as well.

Sweaty around the forehead when working himself up.

Pale skin, sometimes flush

GASSY no anymore

Light brown, auburn hair

Feeding - slow sucking - hole is smaller teat

Flu shot

ADELE

I get the flu shot every year - tonsillitis every year
Pfizer & Moderna 1 each
Pfizer hit me like a ton of bricks, flat emotionally
During pregnancy - whooping cough vaccine & Anti-D A- blood type.

DANIEL

Pfizer & Moderna x 2
