Referring Practitioner:

Dr Amila FERNANDO

Service Street Medical Clinic

services - bairnsdale

Patient Name:

Ian MCNICOL

4 Lorimer Drive

BAIRNSDALE VIC 3875

D.o.B.: 19-05-1950, PID: 2039059

Procedure Date:
16 February 2024

Report Date:
23 February 2024

Report ID: 83627

Radiology Report

Procedure:
Carotid Ultrasound

History:
Dizziness and vertigo. Previous scans demonstrated atherosclerosis.

Findings:
Both common carotid and internal carotid arteries are patent throughout. There quite heavy calcified atheromatous plaque at the origins of both internal carotid arteries, more marked on the right . There are raised peak systolic velocities at the origin of the right internal carotid artery measuring up to 215 cm/sec, which correlates to mild grade 50-59% stenosis. There are no other raised peak systolic velocities seen elsewhere to indicate any other regions haemodynamically significant stenoses.

Both vertebral arteries are antegrade in flow.

Electronically dictated by: Dr Li Enn Yapp MBBS, FRANZCR on 23/2/2024 8:46 PM
