Mr Leigh Anthony NEWSOME
2 Seafoam Street
Hampton East 3188
05/07/1969
0431 273 211

Dear Chris,

Thank you for assessing and managing Mr Leigh Anthony NEWSOME in relation to his recent cardiac symptoms. Leigh has been suffering from intermittent SOB, peripheral oedema, palpitations and more recently central chest pain radiating to his left shoulder. The chest pain was investigated at Alfred hospital, Sandringham campus this week and thought to be related to an episode of elevated blood pressure. I am still awaiting the discharge summary.

Prior to this we were investigating him from a cardiological point of view and I include the results of these - bloods, TTE, Stress test and 24/24 halter monitor. Incidentally Leigh has been triple vaccinated with the covid vaccine and was very supportive of the roll out, he continues to be so.

Past medical History

1970 Osteomyelitis
1980 Fall from tree - head injury
1981 Osgood Schlatters disease
1987 Epilepsy
1990 Anxiety and depression
1991 Rupture of right femoral vein
2000 Back pain - disc pathology L/S spine L5S1
2009 Right shoulder rotator cuff damage
2015 Hyperlipidaemia
2019 GORD
2021 Neuropathic pain
2022 ABI post severe epileptic seizure
2023 Bilateral distal great vein saphenous vein incompetency

Leigh is currently on the following medication:

Celebrex 200mg Capsule
Efexor XR 150mg Capsule, modified release
Epilim EC 500mg Enteric coated tablet
Levetiracetam 500mg Tablet
Norspan 25 25mcg/hr Transdermal Patch

1 Capsule In the morning after meals p.r.n.
1 Capsule In the morning.
1 Tablet Daily 3 nocte.
1 Tablet Twice a day.
1 Patch Once a week.

Thank you for your involvement,

Warm Regards,

Dr Kira Turlakow
