Dear Doctor,

**Re: Mr Michael Stephens**

21 Hume Street  
UPWEY VIC 3158  
**Date of Birth:** 6/9/1980  
**Telephone: Mobile:** 0425850189

**Presenting Problem:**

Kindly review Michael who injured himself in a fall on new year's eve. He was seen by LMO who ordered an us and ct of his R ankle. This has indicated ruptured ATL and undisplaced # tibia . Michael is completely incapacitated by his ankle injury and having a lot of posterior ankle and calf pain and needs specialist management

**Past History:****Active:**

<b>Date</b>	<b>Condition -- Comment</b>
2021	Blepharitis (Left)
2021	Hypercholesterolaemia
2022	Aortic regurgitation Mild
2022	COVID-19 (coronavirus) infection
2023	Fatty liver

**Allergies:**

No known allergies/adverse reactions.

**Current Medications:**

None recorded.

**Referral duration**

Yours sincerely,

Dr Yeong Kuang Oon

**RIGHT ANKLE ULTRASOUND**

No joint fluid. Anterior tendons are normal. The anterior talofibular ligament is tender with no fibres detected. Increased vascularity is noted. Presumed ruptured. No fibres of the anterior inferior tibiofibular ligament detected. Calcaneofibular ligament normal.

Comment

Ligamentous injury laterally as above

CT right foot

Undisplaced fracture of the posterior aspect of the tibia. No medial or lateral malleolus fracture. Talus and calcaneus normal. Midtarsal joints unremarkable. No dislocations.

Comment

Undisplaced posterior malleolar fracture of tibia
