Ultrasound Abdomen

Dear Dr ELLIS,

Thank you for referring Ms ESTHER ROMER TOTH.

Clinical Notes:

Surveillance of mild hepatomegaly and gallbladder polyps.

Comparison:

Abdominal Ultrasound 28/6/2022.

Report:

The liver is again mildly enlarged with a long axis span of 18cm in the midclavicular line.
There is a 9mm cyst in segment 8 and 5mm cyst in segment 4a.
Normal portal vein diameter of 8mm. No dilated bile ducts with normal CBD of 3mm.
No mobile cholelithiasis or accompanying features for cholecystitis.
5 gallbladder polyps up to 5mm with five total again noted and have not increased in size.
The pancreas, spleen and aorta are unremarkable.
Right kidney long axis is 11.7cm and left kidney 11.3cm and the kidneys show no hydronephrosis, scarring or calculi.

CONCLUSION

Five gallbladder polyps measuring up to 5mm (previously largest polyp 7mm).
Mild hepatomegaly with simple hepatic cysts of incidental note.

Yours sincerely,

Dr William Lees
