Re: Luciano De Virgilio
225 Wirraway Street
MOE SOUTH 3825
Date of Birth: 25/12/1958
Phone: 0477093286
Medicare Number: 3024 96851 1 / 1

Dear Christopher,

Thank you for seeing Luciano De Virgilio, aged 65yrs 7mths, whom i consulted today requesting to see you for second opinion, he has holter done and attached , no chest pain , sometimes got arrythmi a, AF for opinion and management.

Presenting Problem: recent holter show no evidence of AF.

Past History:
None recorded.

Allergies:
No known allergies/adverse reactions.

Immunizations:
None recorded.

Current Medications:
None recorded.

Should any of the above need clarification, please feel free to contact me

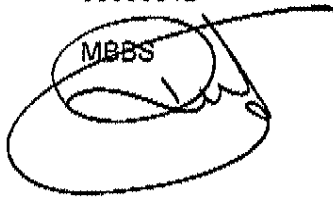

Thankyou for your care and assistance. I look forward to hearing the outcome of Luciano's attendance.

Yours sincerely,

Dr Magdy Demetry

	Recorded 8/7/24	Received 12/7/24	Processed 21/7/24	Report 21/7/24
Name	Luciano DE VIRGILIO			
dob	25-12-58	Age	66	
Address	225 Wirraway Street		Moe Sth	
Referring Dr	Magdy Demetry (Trafalgar)		Ashby Street Medical Centre	
	cc Dharshan	Baw Baw Physicians	ccc	
RecorderLocation	TPM	RN Jessica Duff		
Indication for test	Chronic AF based on ED discharge summary.			
Medications	None stated on request			
Technician	Louise Maguire	Reception	Kate Ferguson	

Resting ECG	Was digitally created and appears normal. Sinus.
--------------------	--

Symptoms	None noted.
-----------------	-------------

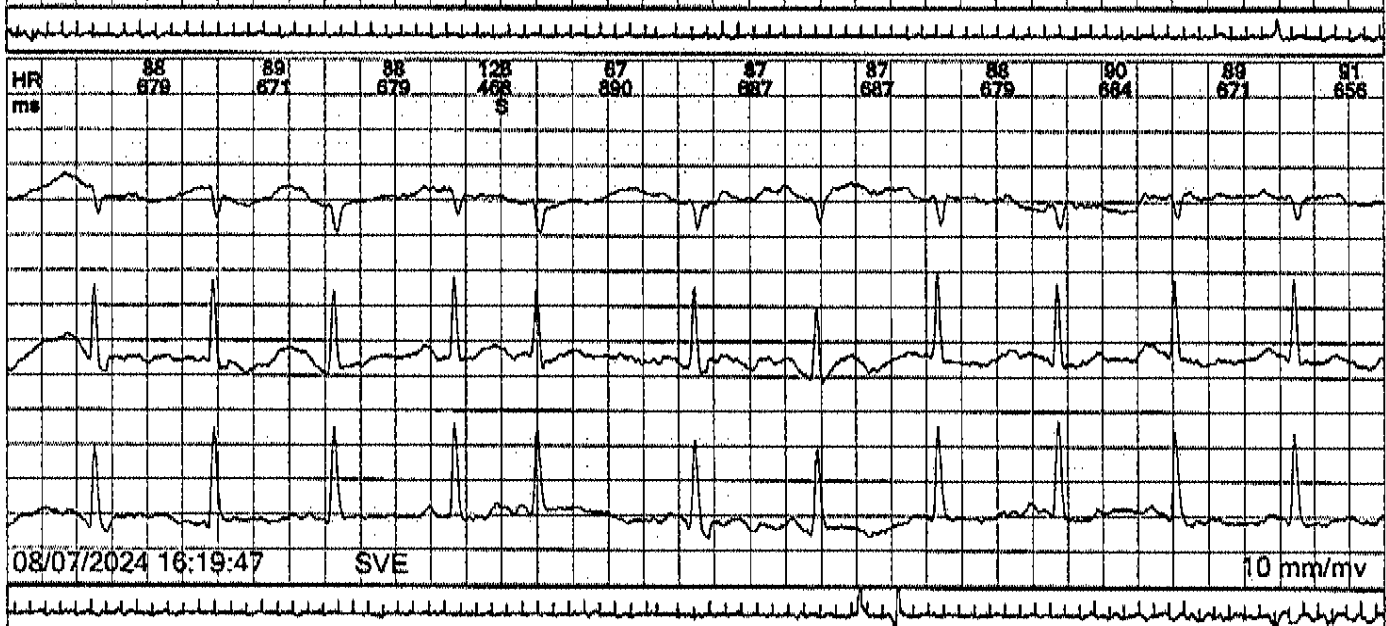

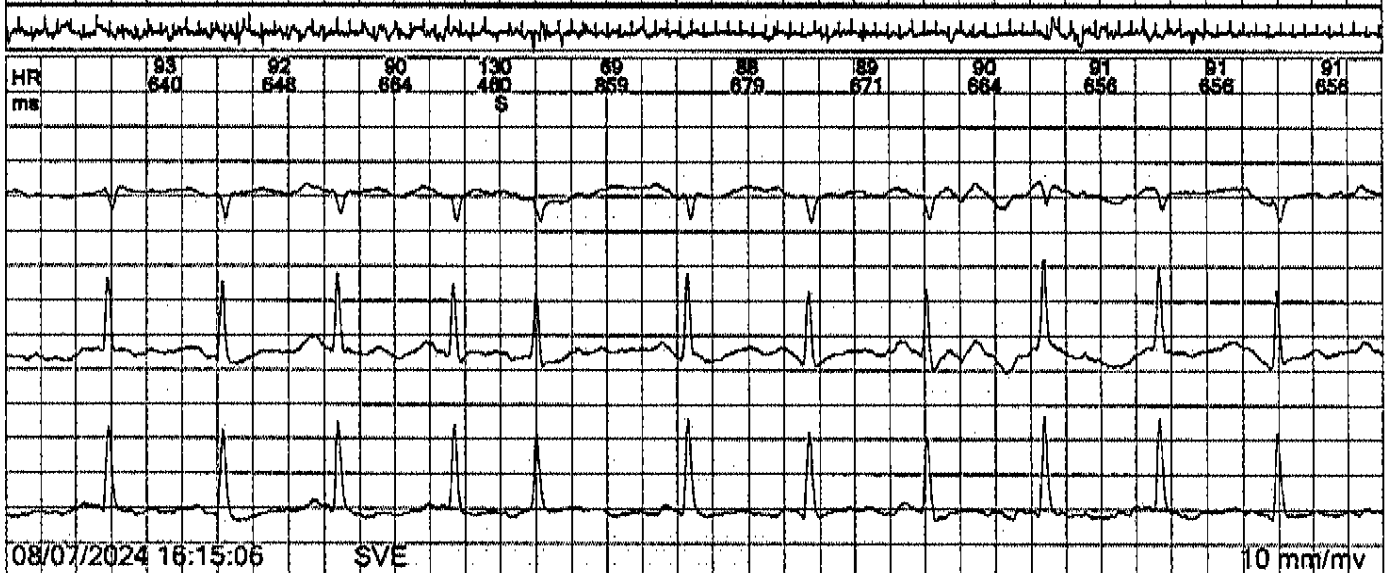

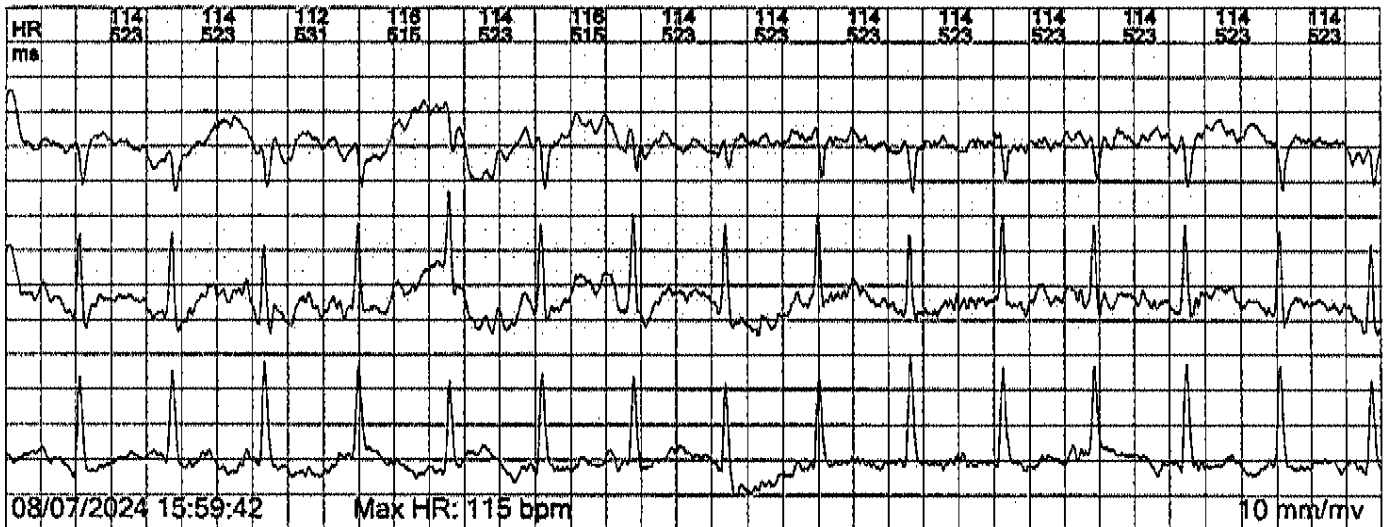

Report	There were 17.3 hours of analysed rhythm. The underlying rhythm was sinus. The average heart rate was 82. The minimum was 59 the maximum was 115. There were 0 pauses more than 2.5 secs. There were 218 SVEs per 24 hours and there were no runs of SVT. There were 2 VEs per 24 hours, and no ventricular pairs. There were no runs of VT. The event marker was not recorded.
---------------	--

CONCLUSION: Sinus rhythm throughout. No significant arrhythmias. No evidence of AF in this study.

Adult Echocardiogram Report

MRN	28218648.0	Exam Date	27/May/2024
Patient Name	DE VIRGILIO LUCIANO	DOB	25/December/1958
Sex	M	Weight:	118 kg
Referring Dr	Dr M Demetry	CC	Height: 1.8 m
Sonographer	Rebecca Beauchamp supervised by M Guirguis		
Rhythm:	Rapid atrial fibrillation		
Indications:	Chronic AF.		
Exam Quality:	Good		

Measurements

2D Dimensions

LVIDd 5.0 cm
LVIDs 2.9 cm
IVSd 1.5 cm
LVPWd 0.9 cm
RA Area 16.6 cm²
LA Area 29.5 cm²
LA Vol 47 ml/m²
IVC 1.6 cm
LVOTd 2.2 cm
EF 72 %
FS 42 %
Ao Root 3.6 cm
AoR Normal size.

Mitral Valve

E/A /
Mpg 1.4 mmHg
PHT
MVA 16.6 cm²
E/e' Avg

Aortic Valve

AV Vmax 1.4 m/s
AV maxPG mmHg
AV meanPG mmHg
AVA

Tricuspid Valve

TR Vmax
RAP 3.0 mmHg
RVSP
Ao Asc 3.9 cm
Ao Asc

Pulmonic Valve

PV Vmax 1.1 m/s
PV VmaxPG mmHg
PV AccT 55 ms

Pericardium Normal, no effusion.

Chamber Findings

Left Ventricle

Normal left ventricular size with mild left ventricular hypertrophy and low/normal systolic function. The estimated EF is 50% in the setting of rapid AF.

Unable to estimate diastolic function due to rapid AF

Right Ventricle

Normal right ventricular size and function.

Left Atrium

Moderately dilated

Right Atrium

Normal size.

Valve Findings

Aortic Valve

Mildly thickened trileaflet aortic valve with unrestricted opening.
No significant regurgitation.

Mitral Valve

There is mild leaflet thickening with normal valvular function.
Trivial regurgitation

Tricuspid Valve

Structurally and functionally normal tricuspid valve.
Trivial regurgitation
Unable to estimate RVSP due to insufficient regurgitation.

Pulmonary Valve

Normal pulmonary valve structure and function.
No significant regurgitation.
Normal IVC size and collapsibility. Estimated RAp is normal at 3mmHg.

Conclusions

Normal LV size with low normal systolic function in setting of atrial fibrillation.
Beat to beat variability in ejection fraction due to arrhythmia, overall LVEF ~ 50%.
Normal RV size and systolic function.
Moderate atrial enlargement.
Satisfactory valve function.
