Updated Plan for Medication Changes

Sarah-Jane and I spoke briefly today by telephone. Due to the effects of the medication change thus far we have altered the plan as follows:

Switch duloxetine to sertraline

Reduce duloxetine from 60mg in the morning to 30mg in the morning. Continue this for **four weeks**, then stop duloxetine. After two days without duloxetine, start sertraline 25mg in the morning. After two days, increase sertraline to 50mg in the morning. Then after a further seven days, increase sertraline to 100mg in the morning

Reduce mirtazapine to from 30mg to 15mg

Yours sincerely,

Dr Neelya Agalawatta
