To the Doctor with the earliest availability,

Thank you for seeing Kirralee Thomson (DOB 23/09/1989)
Kirralee presented to me on 04/12/24, with a diagnosed history of iron deficiency anaemia and current symptoms of fatigue, mind fog, premenstrual headaches, bloating, and a skin rash.

The skin rash appears to be Dermatitis Herpetiformis and as such Kirralee is on a gluten free diet.

I would appreciate your recommendations for further investigation into these symptoms, inclusive of a full iron panel.

If you would like to discuss further, please feel free to contact me on 045702727 or email me at louiseandihhc@gmail.com.
