MRI LEFT WRIST

HISTORY:

Ulnar wrist pain

FINDINGS:

Non-contrast imaging.

Radiocarpal joint is normal appearance, apart from small radiocarpal volar ganglion measuring 9 x 3 x 7 mm. TFC is intact. Small distal radioulnar joint effusion. No radial carpal joint effusion. No carpal abnormality. Scapholunate ligament is intact.

There is mild extensor carpi ulnaris tendinosis and tenosynovitis. Carpal tunnel and Guyon's canal are normal in appearance.

COMMENT:

1. TFC is intact.
2. Mild ECU tendinosis and tenosynovitis.
