<p><u>Nursing</u></p> <p>Notes</p>	<p>Chris has been troubled by pain, swelling and decreased ROM over the last few months. An U/S was completed through WDHS and although I do not have the results of this, Chris tells me that there was evidence of fluid and haematoma. She tells me that she completed a course of antibiotics and is performing regular massage which has relieved most of the pain and she has noted a decrease in swelling. She is interested in scar tissue release to aid with mastectomy scar and release the tightness restricting her ROM.</p> <p>Can you please contact Chris using the details above to arrange a suitable appointment time with yourself.</p>

Thank you for your consideration and if you require any additional information in support of the above referral request please do not hesitate to contact me on 03 5565 2000.

Kind regards,

Signed: Sarah Ramsdale
