

Abi + Stacey

(PAID ON MA)

6/2/25

Sleeping through the day, waking in absent seizures
tremors - NEW

Seizures have changed

~~There~~ Tonic Clonic more freq. w/ focal + absent seizure.

→ requiring rescue remedy - Midazolam.

↓ myoclonic jerks

Only change ~~is~~ was w/ turning jerks x 2-3.

Still have clarity w/ water + AM/PM.

Allergies improved. w/ rems.

Pimples on arms remain - not itchy.

Using clonazepam 1-3 drops 2 x / day as needed.
(blue drops)

Very clingy, "no more seizures"

Gives blue drop w/ nap to avoid absent seizure
seizure will last up to 30 mins @ times.

Drowsy, less active.

no fevers

• Fintepla + Sod. Val. (current reg. meds)

No more turning jerks.

Stacey starting the Power of 8 - set intentions.
