CT LUMBAR SPINE 03/05/2024 Reference: 7350057  
Site: Playford ID: BR-AJG998Z

CT LUMBAR SPINE

**Summary:**

Lumbar degenerative changes including bilateral L5 pars defects without significant associated forward slip. Mild spinal canal and lateral recess stenoses at this level including mild impingement on the extra-foraminal right L4 nerve root.

**Clinical:**

Chronic low back pain.

**Findings:**

Sagittal alignment maintained.

**L2/3:**

No significant spinal or foraminal stenosis.

**L3/4:**

No significant spinal or foraminal stenosis. Slight annular bulge.

**L4/5:**

Bilateral L4 pars defects without significant forward slip. Some bony irregularity is present at this level.

There is mild left sided facet arthropathy.

Mild foraminal stenoses including extra-foraminal contact between the L4 nerve root and the small disc osteophyte complex. Mild lateral recess stenosis.

**L5/S1:**

Mild intervertebral disc degenerative change. No significant spinal stenosis. The L5 exit foramen on the right is mildly narrow. S1 lateral recesses are clear.

Radiologist: Dr A. Wicks
