Clinical notes: cold appetite changes family history of thyroid

Clinical Notes : cold appetite changes family history of
thyroid

Thyroid Antibodies

Thyroid Peroxidase Ab	H 36	IU/mL	(<6)
Thyroglobulin Ab	H 196	IU/mL	(<4)

Comments on Collection 662205861

Thyroid Antibodies: Levels up to 100 IU/mL can occur in normal subjects (5% of males, 15% of females - mainly elderly) and may also occur in non-thyroid autoimmune and chromosomal disorders.

Raised levels may occur in prodromal hypothyroidism before TSH elevations occur and may also be seen in thyrotoxicosis, thyroiditis, non-toxic goitre and thyroid cancer. The levels seen in Graves' Disease and Hashimoto's can vary from normal up to >1000, but are usually elevated.
