Dear Katrina & Greg

Our Reference: 781966

DOB: 6/12/1988

NHI: VUN8257

Thank you for having IVF treatment at Fertility Associates. I'm writing on behalf of the laboratory team with a brief summary of the embryology from this cycle.

Date of egg collection	18/01/2024
Number of eggs collected	4
Method of insemination	ICSI
Number of eggs suitable for insemination using ICSI	3
Number of eggs fertilised normally	3
Number of embryos transferred to the uterus	1
Total number of embryos frozen	1

The storage of frozen embryos is limited to ten years under the Human Assisted Reproductive Technology (HART) Act 2004. The ten-year expiry date will be calculated from the date of storage of eggs or sperm if frozen eggs or sperm were used to create these embryos. An application to extend storage should be made to the Ethics Committee on Assisted Reproductive Technology (ECART) at least 6 months before the 10-year period ends. Please remember to keep in contact with Fertility Associates and to tell us of every change of address so we can keep in touch while you have embryos, eggs or sperm stored.

**The 10-year expiry date for embryo(s) stored in this cycle**

**23/01/2034**

Publicly funded treatment includes storage of embryos up to 18 months.  
Storage fees will apply if embryos are stored beyond this time.

We have followed your instructions on your consent form regarding any eggs and embryos not suitable for freezing.

If you have any questions about this summary of your recent cycle, please feel free to contact us and we will arrange a suitable time to call and discuss this with you in more detail.

We wish you the very best.

Yours sincerely

Mel Olds
