

Julie Smith

29/09/25

Had 3 months of cystitis during Rnd 1 but felt better on stopping supplements.

Since then ( $\pm$  3 wks ago) I've gone back to normal but started feeling irritation a/c bladder spilt + cystitis - lasted 24hrs then cleared. Then again today - slight irritation + more frequent urination.

↳ Stinging in vulva area.  
↳ perineal area.

Very emotional as result of work & ~~money~~ - was unsure if would have job - will but worry about being unsupported in life (no partner, needs

↳ (job for money) I'm shouldering all of life's responsibilities on my own - unfair

[Not good enough] [Staph]

+ prolapse.

Alone
