Dear Abby and David

I was very sorry to hear that in the most recent IVF cycle no embryos were suitable to biopsy.

This is a tough outcome for anyone to face.

Please remember our counselling team are available for you both.

I would like to see you for a face-to-face consultation and have asked our reception team to organise that. We will need to discuss the pros and cons of trying again with your own eggs or possibly considering alternative pathways to parenthood such as using an egg donor.

In the meantime, I wanted to let you know the whole team are thinking of you.

Kind regards

*(Dictated but not sighted)*
