=====

#### **CERVICAL SPINE XRAY**

Alignment on the AP and lateral is preserved. Some prevertebral soft tissue swelling, intervertebral disc spaces preserved.

#### **XRAY RIGHT SHOULDER**

AC joint intact. No displaced fractures are identified. Right glenohumeral joint is enlocated. No soft tissue calcification is seen. No fracture identified of the right shoulder.

#### **XRAY RIGHT ELBOW**

There is some soft tissue calcification in the cubital fossa, non specific. No displaced fractures are identified. There is some loss of the normal roundness of the capitellum, has there been previous injury at all in the past? No acute changes identified. No significant elbow joint effusion identified.

Episode Number: 2020C0004376

Reporting Doctor: Dr Kelvin Yap
